Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chem Abstract 122: 265035 or Dubs et al of record on 1449.

The 122: 265035 reference discloses liquid antioxidants as stabilizers comprising the reaction products from four components: a thiodiethylene glycol, a triglyceride type compound such as sunflower or coconut oil, a phenol containing ester of specific structure, corresponding to the claimed formula (I) wherein $m=0$ and $Y=\text{methyl group}$., and a compound/element. Said compounds are useful for stabilizing polymers and lubricant.

Note that the reactants and the steps of the process have been disclosed in the Abstract.

The Dubs reference discloses a similar composition (see Abstract and at col. 1-8) in that some products have been disclosed in Examples 3-4.

The disclosures of the references differ from the instant claims in that they do not disclose all of the claimed formulae with so many variations.

However, the references do disclose specific components under the same or similar conditions to form the same or similar products. Therefore, it would have been

Art Unit: 1711

obvious to one of ordinary skill in the art to select reactants from the references within the limitation of the claimed formulae to form the same or similar products since they have been shown to be effective in a similar system and thus would have been expected to provide adequate results. There is no showing of unexpected results derived from said selection.
